technical support and consultation sessions

39

online tools available to support business action

34

media mentions across modern slavery topics

PRIVATE SECTOR ACTION

15,234 participants came from the private sector, strengthening business understanding and response to modern slavery risks.

How we supported business action

Our approach empowers businesses to drive meaningful change by combining awareness, practical tools, expert support, and collaborative engagement to address modern slavery risks across global value chains. connects awareness, practical tools, advisory support and peer learning, helping companies embed sustainable labour practices across global value chains.

1 Raise awareness
Targeted trainings and presentations made modern slavery risks more visible across countries and sectors.

2 Build practical capacity
Through toolkits, e-learning modules, and actionable resources, we help translate knowledge into concrete steps that businesses can implement.

3 Deliver expert guidance
Our technical consultations provide businesses with technical expertise to enhance policies, strengthen due diligence, and improve remediation and risk management practices.

4 Advance collaboration
Working groups and our Annual Member Meeting created a safe space for companies to share priorities, lessons and solutions.

Key support metrics

164

organisations received direct technical assistance

1,161

participants in technical support and consultation sessions

8

working group meetings, with 172 participants

Supplier Training

Our supplier training equips partners with the knowledge and practical tools needed to identify, prevent, and address modern slavery risks in their operations. By building awareness and capability at the supplier level, we help strengthen responsible practices across the entire value chain.

33 suppliers trained in Thailand on forced labour indicators, responsible recruitment and practical risk mitigation.

Digital reach and priority initiatives

The Mekong Club expanded access to practical guidance through web resources, online tools, worker-focused technology and multilingual prevention content.
